FM-1200ALKE FLAKE ICE MAKER / FM-1200ALKE (-N) NUGGET ICE MAKER

Product Description

The FM-1200ALKE (-N) is a modular ice maker which produces either flake or nugget ice. This product works in combination with an external compressor and condenser. The flake and nugget ice is popular for a variety of cooling purposes including the display of fish and fresh produce as well as in the medical world for cooling blood and organs.

- Hoshizaki ice makers are micro computer controlled, controlling the ice making process to perform at its best under varying circumstances, without having to make physical adjustments.
- The characteristics of the ice produced by Hoshizaki ice makers means that 'freeze-burn' is no longer an issue when displaying fresh fish or produce.
- Quality stainless steel auger and evaporator increase the life expectancy of these components and the whole ice maker, as well as reducing costly maintenance visits.
- An easily cleanable air filter allows end users to carry out a routine cleaning schedule, extending product life expectancy and reducing the frequency and costs of maintenance call-outs.
- Due to the auger system the water consumption is equal to the ice production.

Available Models

FM-1200ALKE (Air Cooled)
FM-1200ALKE-N (Air Cooled)

Ice

Model	Shape
FM-1200ALKE	Flake - Approx. (70% ice hardness, 30% water)
FM-1200ALKE-N	Nugget - Approx. (88% ice hardness, 12% water)

Flake
